FIXED INCOME MARKET REVIEW

As of June 30, 2023

Chart 1: The FOMC's "dot plot" was amended

Source: Bureau of Labor Statistics, June 30, 2023

Chart 2: Core services inflation showed no signs of flagging

Source: Federal Reserve, June 30, 2023

Economic Indicators and Monetary Policy

The Federal Reserve kept rates on hold for the first time since February 2022. However, it delivered a decidedly hawkish message. After keeping its quarterly median "dot plot" projections relatively static over the previous two quarters, the Fed increased its projections (Chart 1), now reflecting two additional 25bp hikes in 2023 when many had expected a maximum of one. Real Fed Funds Rates moved into positive territory indicating the Fed's policy will have a restrictive impact at current levels.

Headline CPI continued to make strong progress, reaching 4.0% year-on-year in May, falling from 4.9% in April, the lowest since early 2021. On the other hand, Core CPI remained stubborn, at 5.3%, only down from 5.5% last month, and over a longer period not much lower than its 5.6% rate in January this year. Of the non-core categories, energy was the largest negative contributor. Core goods prices continued to pick up, but this was almost entirely due to a continuing bounce in used vehicle prices. Shelter was once again the largest weighted monthly contributor, but it appears to be past its peak. "Supercore" CPI, the Fed's closely watched inflation measure, continued to moderate from 5.1% to 4.6%.

Q1 GDP was revised upward from 1.3% to 2.0% (a second upward revision from an initial 1.1% estimate). Consumption, particularly services spending, was revised up and net exports were revised stronger. Elsewhere, durable goods orders were stronger than expected, increasing by 1.7% month-on-month. Particularly strong sectors were transportation goods with increases for new orders for both autos and aircrafts.

The labor market remained resilient. Payrolls rose by 339,000 in May, stronger than consensus expectations for ~200,000. Private payrolls rose by 283,000 jobs, with a 26,000 increase in goods sectors and a 257,000 increase in services. Wage growth remained stable on a year-on-year basis at 4.3%. The unemployment rate rose to 3.7% from 3.4% with the participation rate unchanged at 62.6%.

Interest Rate Summary

Yields rose across the curve. At the end of June, the 3-month US Treasury bill yielded 5.30%, the 6-month US Treasury bill yielded 5.43%, the 2-year US Treasury note yielded 4.90%, the 5-year US Treasury note yielded 4.16% and the 10-year US Treasury note yielded 3.84%.

ADDITIONAL INFORMATION

As of June 30, 2023

Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may partly be due to exchange rate changes) and investors may not get back the amount invested. Transactions in foreign securities may be executed and settled in local markets. Performance comparisons will be affected by changes in interest rates. Investment returns fluctuate due to changes in market conditions. Investment involves risk, including the possible loss of principal. No assurance can be given that the performance objectives of a given strategy will be achieved. The information contained herein is for your reference only and is being provided in response to your specific request and has been obtained from sources believed to be reliable; however, no representation is made regarding its accuracy or completeness. This document must not be used for the purpose of an offer or solicitation in any jurisdiction or in any circumstances in which such offer or solicitation is unlawful or otherwise not permitted. This document should not be duplicated, amended, or forwarded to a third party without consent from Insight. This is a marketing document intended for professional clients only and should not be made available to or relied upon by retail clients.

Investment advisory services in North America are provided through two different SEC-registered investment advisers using the brand Insight Investment: Insight North America LLC (INA) and Insight Investment International Limited (IIL). The North American investment advisers are associated with a broader group of global investment managers that also (individually and collectively) use the corporate brand Insight Investment and may be referred to as Insight, Insight Group or Insight Investment.

INA is an investment adviser registered with the Securities and Exchange Commission (SEC), under the Investment Advisers Act of 1940, as amended. Registration with the SEC does not imply a certain level of skill or training. You may request, without charge, additional information about Insight. Moreover, specific information relating to Insights strategies, including investment advisory fees, may be obtained from INA's Form ADV Part 2A, which is available without charge upon request.

Where indicated, performance numbers used in the analysis are gross returns. The performance reflects the reinvestment of all dividends and income. INA charges management fees on all portfolios managed and these fees will reduce the returns on the portfolios. For example, assume that \$30 million is invested in an account with INA, and this account achieves a 5.0% annual return compounded monthly, gross of fees, for a period of five years. At the end of five years that account would have grown to \$38,500,760 before the deduction of management fees. Assuming management fees of 0.25% per year are deducted monthly from the account, the value at the end of the five year period would be \$38,022,447. Actual fees for new accounts are dependent on size and subject to negotiation. INA's investment advisory fees are discussed in Part 2A of its Form ADV.

Unless otherwise stated, the source of information is Insight. Any forecasts or opinions are Insight's own at the date of this document (or as otherwise specified) and may change. Material in this publication is for general information only and is not advice, investment advice, or the recommendation of any purchase or sale of any security. Insight makes no implied or expressed recommendations concerning the manner in which an account should or would be handled, as appropriate investment strategies depend upon specific investment guidelines and objectives and should not be construed to be an assurance that any particular security in a strategy will remain in any fund, account, or strategy, or that a previously held security will not be repurchased. It should not be assumed that any of the security transactions or holdings referenced herein have been or will prove to be profitable or that future investment decisions will be profitable or will equal or exceed the past investment performance of the securities listed.

Please compare the information provided in this statement to the information provided in the statement received from your Custodian.

For trading activity the Clearing broker will be reflected. In certain cases the Clearing broker will differ from the Executing broker.

In calculating ratings distributions and weighted average portfolio quality, Insight assigns U.S. Treasury and U.S. agency securities a quality rating based on the methodology used within the respective benchmark index. When Moody's, S&P and Fitch rate a security, Bank of America and Merrill Lynch indexes assign a simple weighted average statistic while Barclays indexes assign the median statistic. Insight assigns all other securities the lower of Moody's and S&P ratings.

Information about the indices shown here is provided to allow for comparison of the performance of the strategy to that of certain well-known and widely recognized indices. There is no representation that such index is an appropriate benchmark for such comparison. You cannot invest directly in an index and the indices represented do not take into account trading commissions and/or other brokerage or custodial costs. The volatility of the indices may be materially different from that of the strategy. In addition, the strategy's holdings may differ substantially from the securities that comprise the indices shown.

The ICE BofA 3 Month US T-Bill index is an unmanaged market index of U.S. Treasury securities maturing in 90 days that assumes reinvestment of all income.

The ICE BofA 6 Month US T-Bill index measures the performance of Treasury bills with time to maturity of less than 6 months.

The ICE BofA 1-Year US Treasury Index is a one-security index comprised of the most recently issued 1-year US Treasury note. The index is rebalanced monthly. In order to qualify for inclusion, a 1-year note must be auctioned on or before the third business day before the last business day of the month.

The ICE BofA 3-Year US Treasury Index is a one-security index comprised of the most recently issued 3-year US Treasury note. The index is rebalanced monthly. In order to qualify for inclusion, a 3-year note must be auctioned on or before the third business day before the last business day of the month.

The ICE BofA 5-Year US Treasury Index is a one-security index comprised of the most recently issued 5-year US Treasury note. The index is rebalanced monthly. In order to qualify for inclusion, a 5-year note must be auctioned on or before the third business day before the last business day of the month.

The ICE BofA 1-3 US Year Treasury Index is an unmanaged index that tracks the performance of the direct sovereign debt of the U.S. Government having a maturity of at least one year and less than three years.

The ICE BofA 1-5 US Year Treasury Index is an unmanaged index that tracks the performance of the direct sovereign debt of the U.S. Government having a maturity of at least one year and less than five years.
