

7. **AWARD OF CONTRACT FOR PROFESSIONAL SERVICES IN THE COMPLETION OF A COMMUNITY SURVEY**

Report: Recommendation: It is recommended that the Council award a Professional Services Contract to Probolsky Research for an amount up to \$19,000; direct the City Attorney to prepare the Contract; and authorize the City Manager to execute the Contract on behalf of the Town.

Description:

Item No. 7 Town of Atherton

CITY COUNCIL STAFF REPORT – REGULAR AGENDA

TO: HONORABLE MAYOR AND CITY COUNCIL

FROM: GEORGE RODERICKS, CITY MANAGER

DATE: MAY 15, 2024

**SUBJECT: AWARD OF CONTRACT FOR PROFESSIONAL SERVICES IN
THE COMPLETION OF A COMMUNITY SURVEY**

RECOMMENDATION

It is recommended that the Council award a Professional Services Contract to Probolsky Research for an amount up to \$19,000; direct the City Attorney to prepare the Contract; and authorize the City Manager to execute the Contract on behalf of the Town.

BACKGROUND

The City Council authorized the release of a Request for Proposal (RFP) to conduct a broad community survey beginning in early 2025. The Goals of the Survey are to:

- Measure general attitude of residents toward Town services and programs;
- Determine residents' priorities and areas of concern; and
- Receive feedback on key policy issues or priorities.

The initial survey would include questions that could be used as a benchmark for future surveys and the Town could consider conducting future surveys on a multi-year cycle. Input from the community will help the Town better understand the community, inform budget priorities, and identify infrastructure needs.

An RFP was released in February 2024. A copy of the RFP is attached as Attachment 1.

ANALYSIS

The Town received 7 responses to the RFP. After review of the responses, two were selected to interview. The City Council Subcommittee (Mayor Hawkins-Manuelian & Vice Mayor Lewis) and staff interviewed the top two respondents.

After interview, the Subcommittee and staff recommend that the City Council award a Professional Services Contract to Probolsky Research in the amount of \$19,000. The RFP response from

Probolsky Research is included as Attachment 2. The City Council has already authorized a budget amendment for the project in the FY 2023/24 Budget and this amount is within the City Manager's signature authority. However, given the high-profile nature of a community survey, staff opted to return award of contract to a City Council meeting to allow the Council to ask any questions of the Council Subcommittee.

Probolsky Research's work will involve collaboration with staff to determine the most cost-effective, reasonable and productive survey methodology. Questions will be developed in concert with the City Council Subcommittee, staff and representatives from the Town's key stakeholder groups. These groups include, but may not be limited to:

- Town Committees (Park & Recreation, Planning, etc.)
- Town Designated Groups (ADAPT, Art Foundation, Rail, Tree, Senior Group, etc.)
- Ad Hoc Community Organizations (LHA, etc.)

Once input from stakeholder groups is consolidated, Probolsky Research will work with the Subcommittee and staff to finalize survey questions. To preserve the integrity of the survey process, it is recommended that Probolsky Research maintain control over the survey implement and that the survey not be "pre-released" at a public meeting. The survey is not intended to be released until early 2025.

FISCAL IMPACT

The contract for services is for an amount *up to* \$19,000.

GOAL ALIGNMENT

This Report and its contents are in alignment with the following Council Policy Goals:

- Goal Area E – Strengthen Community Engagement and Transparency

POLICY FOCUS

The policy focus for this item is on the need to conduct of a community survey.

PUBLIC NOTICE

Public notification was achieved by posting the agenda, with this agenda item being listed, at least 72 hours prior to the meeting in print and electronically. Information about the project is also disseminated via the Town's electronic News Flash and Atherton Online. There are approximately 1,200 subscribers to the Town's electronic News Flash publications. Subscribers include residents as well as stakeholders –to include, but be not limited to, media outlets, school districts, Menlo Park Fire Protection District, service provides (water, power, and sewer), and regional elected officials.

COMMISSION/COMMITTEE FEEDBACK/REFERRAL

This item has not been before a Town Committee or Commission

INTRODUCTION AND OVERVIEW

Project Overview

The Town of Atherton (the Town) is soliciting proposals from qualified firms to conduct at least one community survey around early 2025. Working with Town staff and representative committee members (the committee), the selected consultant will develop an appropriate survey process and methodology to measure community input and sentiment on various topics. The consultant will be responsible for creating and administering the survey after obtaining committee input on questions; tabulating the results; and presenting a final product to Town officials in a written report and formal presentations.

Questions regarding the RFP can be directed to George Rodericks, grodericks@ci.atherton.ca.us.

Background

The Town of Atherton, incorporated in 1923, is a small residential community, with approximately 7,188 residents. The Town extends from slightly west of the Bayshore Freeway (US 101) up to I280 and is approximately 4.5 miles long and 1.5 miles wide. Its municipal neighbors include Menlo Park to the south, Woodside to the west and Redwood City to the north.

A general law city, Atherton has a Council-Manager form of government. Five council members serve at-large for four-year terms. The City Council selects a mayor from among its members each December for a one-year term. The city manager is appointed by the City Council and serves as the chief executive officer responsible for the day to-day administration of Town affairs. The Council also appoints a city attorney. There are four (5) advisory committees and one (1) planning commission appointed by the Council.

The Town provides a wide range of municipal services including police, public works, engineering, parks and open space, library, finance, planning and zoning, building inspection, street maintenance, and general administrative services.

COMMUNITY PROFILE – DEMOGRAPHICS

Atherton has approximately 7,188 residents. There are approximately 2,183 households in the Town, 76 percent of which are families with an average size of 3.2. The median household income is \$250,000+. The population is well educated with 86 percent having obtained a bachelor's degree or higher. Approximately 24% of the population is 65 years old or older. Atherton is a diverse community with race and ethnicity demographics of 7% Hispanic, 20% Asian, and 67% White. About 4.8% of the population speak Spanish at home and 11.4% speak Asian or Pacific Islander languages. *Source: 2022 American Community Survey 5-Year Estimates*

| | 20 to 34 years | 15.7% |
| | 35 to 64 years | 33.9% |
| | 65 and over | 23.7% |
| Median Age | | 46.2 |

PROJECT OBJECTIVES

In at least the last decade, the Town has not conducted a formal community survey to gauge residents' general satisfaction with Town services, community aspirations and concerns, or on policy-related topics. In 2013, the Town conducted a survey to poll residents on a specific parcel tax measure and that survey included satisfaction components.

The Town's intent is to conduct a broader community survey beginning in early 2025 and the Town may consider conducting future surveys on two-year cycles. The initial survey should include questions that could be used as a benchmark for future surveys.

The Town recently completed its most significant facilities upgrade in over 50 years – the new Town Center. Capital project focus now shifts to much needed capital infrastructure priorities. The Town is also finalizing updates to its General Plan Housing Element and may conduct land use and zoning changes over the next several years to meet the obligations under the Element. In addition, the Town has recently completed an Age-Friendly Community Engagement process and received feedback highlighting a need to provide additional services to this important segment of the community. Lastly, the Town would like to engage the community on a broad range of community feedback soliciting input for the survey content from the Town's various community committees and planning commission (Audit/Finance, Transportation, Bicycle, and Pedestrian, Environmental Programs, and Parks).

Community input is central to these processes. Input from the community will help the Town better understand the community, inform budget priorities, and identify infrastructure needs. In the interest of keeping the survey to an effective length, the Town is open to using a variety of survey methodologies and analytics, to include the use of AI-technologies.

Goals include:

- Measure general attitude of residents toward Town services and programs.
- Determine residents' priorities and areas of concern.
- Receive feedback on key policy issues or priorities.

SCOPE OF WORK

The purpose of this RFP is to select a qualified research firm to conduct a survey of residents, provide recommendations on question development as well as a recommended approach to reach a diverse audience.

The selected firm will:

- Host an initial meeting to kick off the process with Town staff and committee.
- Create survey instruments, work plans and schedules, in consultation with Town staff.
- Collaborate with Town staff to determine the most cost-effective, reasonable, and productive survey methodology. Provide recommendations on the number of survey questions, suggested content and questions, and duration of survey to maximize engagement results.
- Provide recommendations on whether to conduct a single survey or two surveys to accomplish the project goals.
- Develop survey questions to gauge community perceptions on:
 - Quality of life;
 - Personal and Property Crime
 - Traffic
 - Environmental Safety - Fire/Flooding/Power Outages;
 - Sense of community;
 - Important issues facing the Town;
 - Contact with the Town and sources of information; and
 - Review demographic information.
- Recommend appropriate methodologies and strategies for providing the best data samples, objective results and valid findings, including one or a combination of medium such as phone, mail or internet.
- Conduct the survey(s) ideally around winter/spring 2025, but no later than April 2025.
- Provide a draft (within 30 days of the survey's completion) and final report of the survey's results in both detailed and summarized form, including any conclusions or recommendations drawn from the findings.
- Hold a meeting with Town staff and committee to review the preliminary results and data.
- Present the results to Town staff, City Council and other key stakeholders identified by the Town (minimum of two presentations.) All presentations will be developed in collaboration with the Town, with length and content varied based on the audience.

SUBMITTAL REQUIREMENTS

All responses must be made in writing and include the name, address, telephone number and email of the consultant firm's primary contact for the proposal. All proposals should be specific, brief (not to exceed 10 pages) and include the following:

- **Cover Letter:** Explain the applicant’s experience providing similar services for government entities, including experience identifying important policy options based on research and analyses.
- **Response to the Scope of Services:**
 - Provide demonstrated understanding of the Town’s needs and scope of the project; and describe past efforts to establish baseline perceptions and opinions regarding a variety of topics.
 - Describe the recommended approach, suggested sample size, research methodology, timeline and work plan.
 - Provide a management plan with a description of qualifications of the key personnel selected to lead the scope of services.
 - Identify tasks the consultant will perform versus tasks Town staff will perform or coordinate.
 - Identify any suggested modification to the scope of services listed above.
- **Contract Requirements:** Acknowledgment that a contract and insurance will be provided in accordance with Town requirements. Contact Anthony Suber, City Clerk for insurance requirements.
- **References:** Provide at least three municipal case studies of the proposer’s recent work. Case studies would showcase the firm’s approach to developing surveys, format and type of questions generated, and how the data was presented. Include the name of the organization, summary of work performed and contact information.
- **Budget:** Costs proposed to complete the above scope of services, as well as any recommended alternative scope of services.
 - If the fee is based on hourly rates, include rates for all team members, the expected range of billable hours, and a “not to exceed” budget.
 - Identify how potential options regarding methodology, sample size, number of survey questions, language, and use of AI-technologies could affect the cost.
 - Provide proposed incremental costs for any optional services, or other variability in services, particularly the cost for additional presentations beyond a minimum of two.

Submittal Location and Deadline:

Interested parties should submit four (4) printed copies and an electronic copy of their proposals as follows:

Proposals must be received by 5 p.m. March 29, 2024

- Hard copies should be sent to:
 George Rodericks, City Manager
 Town of Atherton
 80 Fair Oaks Lane
 Atherton, CA 94027

- An electronic copy should be sent to: grodericks@ci.atherton.ca.us or may be shared via an online file hosting service or delivered on a USB drive.

SELECTION PROCESS

The Town will evaluate each of the proposals based on a variety of criteria including:

- Understanding of the project and technical approach.
- Firm's qualifications and technical experience, particularly within the municipal government policy environment.
- Overall project design and methodology.
- Proposed cost to provide the requested services.

Town staff and a City Council Subcommittee will review the proposals and may select finalists to participate in an oral interview. The Town will only notify those consultants selected as finalists. Once the Town selects a consultant, the Town and consultant will execute a professional services agreement.

Right to Reject

The Town reserves the right to accept and or reject any or all proposals submitted, and or to request additional information from all proposers. The Town also reserves the right to modify any aspects of, terminate, or delay this RFP, the RFP process, and or the program, which is outlined within this RFP at any time. Contract award will be made at the sole discretion of the Town based on evaluation of all responses.

San Francisco, CA 94111
adamp@probolskyresearch.com
Telephone: 415-870-8150

George:

Thank you for the opportunity to offer our research services to the Town of Atherton. We look forward to conducting a statistically valid community survey in early 2025. We welcome the opportunity to work with the Town to conduct future surveys on two-year cycles.

Having conducted thousands of similar projects for local governments nationwide and throughout California, we have unmatched experience identifying important policy options based on research and analyses. Our research will identify community needs and collect feedback from across the Town, including any historically marginalized communities. Some relevant clients include the cities of Arvada (CO), Brisbane, Dunwoody (GA), Falls Church (VA), Half Moon Bay, Hampton (VA), Grover Beach, Napa, and Rochester Hills (MI) and the counties of Arlington (VA), Dakota (MN), Ottawa (MI), Richland (SC), Santa Clara Valley Water District, Santa Cruz, and Wake (NC).

We look forward to working with staff on this project. Our specific methodological recommendations will help us achieve an inclusive representation of the Town's residents. We will develop an appropriate survey process and methodology to measure community input and sentiment on various topics, create and administer the survey after obtaining committee input on questions, and tabulate survey results. We will track findings over time to help Town measure progress as well as benchmark data to help Town understand where you stand compared to other similar-situated communities in California.

We are a team of communication, data, economic, and public policy experts – unique for a research firm, but a hugely important part of our ability to measure general attitude of residents toward Town services and programs, determine resident priorities and areas of concern, and receive feedback.

We bring the understanding of diverse communities to our work and the language capabilities that ensure that our research is more accurate than any other firm can provide. To ensure inclusivity and representation of all voices, and to limit communication barriers, we will conduct our research in **English and Spanish** – other languages are available. Our in-house equity officer will help ensure the research process is sensitive to ADA and diversity, equity, and inclusion (DEI) issues in design and distribution methods.

You can count on me to be available, as much as requested to be available for meetings and make presentations – **in-person** or virtually to Town officials. We are looking forward to working together on this important project and helping build the roadmap to your strategic goals and priorities.

We acknowledge that a contract and insurance will be provided in accordance with Town requirements.

Sincerely,

Adam Probolsky, President

Response to the Scope of Services

Company Profile

Established in 1992 and organized as a Limited Liability Corporation, Probolsky Research LLC specializes in market and opinion research. We are a woman and Latina-owned firm; we are multi-lingual. Probolsky Research is a Certified California Small Business Enterprise (ID 1758330).

Probolsky Research conducts research in government, business, non-profit, election, and association practice areas. We are traditional market researchers and pollsters who are constantly innovating, without compromising on quality. We connect our clients with the necessary individuals to best maximize their research initiatives for valuable insights.

You will always work with our senior team at the executive and director level, all of whom have research related degrees and expertise.

Probolsky Research understands community and municipal needs: We have acted as pollster and strategic advisor on hundreds of local, county, and statewide government agencies – each community has its own unique constituency. We have conducted more than 1,000 surveys for government clients.

Our active engagement in organizations such as the American Association of Public Opinion Research, Insights Association and American Association of Political Consultants ensures that we have the latest perspectives on outreach and research. Additionally, Probolsky Research has partnered with the Institute of Local Government.

Services

Our research services include:

- Telephone surveys
- Mail surveys
- Online surveys
- Multi-mode surveys
- Individual in-depth interviews (IDIs)
- Focus groups
- Field Focus Groups™
- Community meetings
- Engagement
- Community Discussion Boards

Client Service Philosophy

We include unlimited meetings and presentation time. We welcome the chance to meet **in-person** and make presentations as directed, without limitations.

We believe in regular and open communication and a collaborative working relationship. We know that staff is busy, so we limit the need for staff time and make ourselves available on your schedule.

We try not to take up the time of Town staff. Apart from a preliminary data download and questionnaire edits, we do not see the need for the Town to provide any additional services for us to complete our work. However, we always welcome more involvement from staff throughout the research process. We love working collaboratively. We do not have any suggested modification to the Town's scope of services.

We provide a truly individualized method for our research. We do not believe in a one-size-fits-all approach. This means that we provide *custom* research projects to meet the Town's individual needs. We work collaboratively with you to get the most out of your research with a personalized approach that will exceed your expectations and provide a tailored experience that larger firms do not provide. All our work will be custom to the Town while also receiving the benefit of our deep reservoir of comparative data.

Project Initiation

We begin every research project by understanding how our client got to this moment in time. We are aware the Town recently completed its most significant facilities upgrade in over 50 years – the new Town Center and that capital project focus now shifts to much needed capital infrastructure priorities. We are also aware that the Town would like to engage the community on a broad range of community feedback soliciting input for the survey content from the Town's various community committees and planning commission – community input is central to these processes – input from the community will help the Town better understand the community, inform budget priorities, and identify infrastructure needs. We have already reviewed resident demographics and other relevant data.

You cannot overwhelm us with background information and data. We expect to pour through staff reports, financial reports, past polling, news clips, and social media posts talking about the Town. We believe this is an essential part of providing best practice approaches to the Town that enhance efficiency and effectiveness. There is nothing peripheral about our work. We are passionate about helping local agencies improve their connection with their constituents.

Town of Atherton Resident Analysis

We have conducted an initial analysis of Town adult residents based on Census data. Should the Town prefer that we exclusively survey voters, that is an option.

| Gender/Age demographics | Percentage | Ethnicity/Home Type demographics | Percentage |
|-------------------------|------------|------------------------------------|------------|
| Gender (Male) | 50% | Ethnicity (Latino/Hispanic) | 9% |
| Gender (Female) | 50% | Ethnicity (White/Caucasian) | 67% |
| Age (18-29) | 24% | Ethnicity (Black/African American) | 1% |
| Age (30-39) | 8% | Ethnicity (Asian/Pacific Islander) | 20% |
| Age (40-49) | 11% | Ethnicity (Other/Multi-racial) | 3% |
| Age (50-64) | 27% | Home Type (Owner) | 62% |
| Age (65+) | 30% | Home Type (Renter) | 38% |

Goals

Specifically, we will:

- **Host** an initial meeting to kick off the process with Town staff and committee
- **Create** survey instruments, work plans and schedules, in consultation with Town staff
- **Collaborate** with Town staff to determine the most cost-effective, reasonable, and productive survey methodology – providing recommendations on the number of survey questions, suggested content and questions, and duration of survey to maximize engagement results
- **Provide** recommendations on whether to conduct a single survey or two surveys
- **Develop** survey questions to gauge community perceptions on quality of life, personal and property crime, traffic, environmental safety, sense of community, important issues facing the Town, contact with the Town and sources of information, and review demographic information
- **Recommend** appropriate methodologies and strategies for providing the best data samples, objective results, and valid findings, including one or more mediums (i.e., phone, mail, online)
- **Conduct** the survey(s) ideally around winter/spring 2025, but no later than April 2025
- **Provide** a draft and final report of the survey's results in both detailed and summarized form, including any conclusions or recommendations drawn from the findings
- **Hold** a meeting with Town staff and committee to review the preliminary results and data
- **Present** the results to Town staff, City Council, and other key stakeholders identified by the Town

Research Design

We begin every research project by meeting with Town staff to develop the questions the research needs to answer. We undergo extensive review of primary and secondary data sources including past research, comparable studies, staff reports, financial reports, news clips and articles, social media posts and any other relevant data to inform our research. Through this deep dive approach, we develop the necessary historical context to inform and identify collaboratively with the Town the objectives, goals, and priorities for the community survey.

Using the information gleaned from meetings, past research, background information provided by staff, and our own open-source preliminary research, we will make recommendations for the number of questions, suggested content and questions, and duration of survey to maximize engagement results.

We are always available to our clients. We will continually keep the Town informed of progress with meetings and updates. We will accommodate any meeting or call schedule staff requests. As an example, this might include daily emails, weekly calls, and monthly meetings. At least one project team member will be available 24/7 for urgent matters.

Following meetings or conference calls in which we discuss proposed modifications, we will incorporate agreed-upon changes. We recognize that this may require several rounds of revisions. Once we produce the final draft, we will submit the questionnaire for final approval before the survey is translated and fielded. Once the questionnaire has been finalized, we professionally translate the questionnaire into the languages decided on, create phonetic pronunciations of names for telephone responses, and establish proportions to match resident demographics and geographic location within the Town, and program the proportions, along with the survey, into our software utilized for telephone and online responses.

After programming, the survey is tested for logic and presentation. Once this initial testing has been completed, we conduct a soft launch, also known as a pre-test, of the survey and collect 20 completed interviews. Once the pre-test collection period is complete, our team meets to go over the results and address any problem areas that come to light, adjusting the survey as necessary. We conduct quality control checks on a regular basis throughout the survey process. We check for correct skip patterns, randomization and rotation, and completeness of responses. We also actively monitor to ensure that respondents will match the demographic make-up of Town residents.

Research Process and Community Outreach

Prior to launching the survey, we will provide the Town with a research process memo that explains the key points, timing, and structure of the survey. This document allows the Town to conduct better outreach to residents, define goals, and increase overall participation when conducting outreach before administering the survey. You can view an example research process memo by following [this link](#). We will help with social media posts, press releases, and other public-facing outreach as requested.

Cyber Security, Confidentiality, & Certifications

We take data integrity and confidentiality seriously. All client materials are hosted in a secure digital cloud environment. We use 256-bit Advanced Encryption Security to keep your data secure. This is the same level of encryption used by the U.S. Government. *Our data is stored on U.S. based computers and cloud services. Research is only released per staff's direction.*

We use Box for content management. This cloud-based, encrypted system allows us to gather data and manage projects seamlessly and securely.

We have multiple team members who hold certifications in the protection of human subjects in research from the Collaborative Institutional Training Initiative (CITI). CITI is the leading provider of research ethics and compliance education, utilized by academic, medical, and social science researchers across the United States and globally.

Conduct Research

Statistically Valid Multi-mode, Multi-lingual Survey Approach

We use a multi-mode methodology for all surveys, meaning that we will conduct the survey by several modes that may include telephone, online via our secure digital platform through email, and text message, as well as other options like mail. This multi-mode approach maximizes the accuracy and reach of the research, increases participation rates, and minimizes response bias. We look forward to a robust discussion with Town staff to determine the ideal survey methodology.

Participants can choose their preferred language at the onset of their survey experience. Online participants can complete the survey from any device: computer, tablet, or mobile phone. Telephone participants use their landline or mobile phone to complete the survey.

Our statistically valid multi-mode, multi-lingual approach is the most advantageous to the Town because it will provide the most accurate and inclusive survey results.

Suggested Sample Size

A sample size of 300 residents is robust and will yield a $\pm 5.8\%$ margin of error at a 95% level of confidence. The statistically representative, random sample will allow for statistically reliable comparisons among all subgroups of the Town's population (e.g., by demographic and geographic variables). We have also provided an option for 400 completed surveys.

Sample Stratification

The statistically valid sample file of Town of Atherton residents will be secured by Probolsky Research, at our expense, from consumer and government databases that includes addresses, emails, and phone numbers – (landlines and mobile phones) and is inclusive of all residents, both demographically and geographically.

Unique to Probolsky Research: We match the demographics of Town of Atherton residents. This means we capture real responses of the right number of each gender, age group, ethnicity, etc.

Analysis and Reporting

Once our data collection phase is complete, we begin a process of comprehensive data analysis and reporting to deliver accurate, thorough, and actionable data insights to the Town.

Data Analysis

We complete comprehensive statistical analyses of the research results, utilizing software programs, including IBM SPSS and R to conduct deep statistical testing, such as multiple regression analysis. Both qualitative and quantitative data will be analyzed in a scientifically valid manner. This helps us discover and present statistically significant results – beyond the broad opinions – and understand the specific factors that contribute to attitudes and beliefs of residents. Such analyses are crucial in identifying gaps in public perception and awareness. Once we have run all analyses on results, cross tabulations are developed, graphics are generated, and other elements of the report are prepared.

Verbatim Responses to Open-Ended Questions

For open-ended questions, we code the responses into categories. Once these categorizations have been quantified, we take our analysis a step further. We analyze the tone and word choices and overlay demographic data for each response. This demographic overlay will provide the Town with a deep understanding of the opinions by age, ethnicity, gender, home type, income, language, etc. when reading their comments. Here is an example:

Female, 40-49, White/Caucasian, English, \$75,000- \$149,000, Homeowner

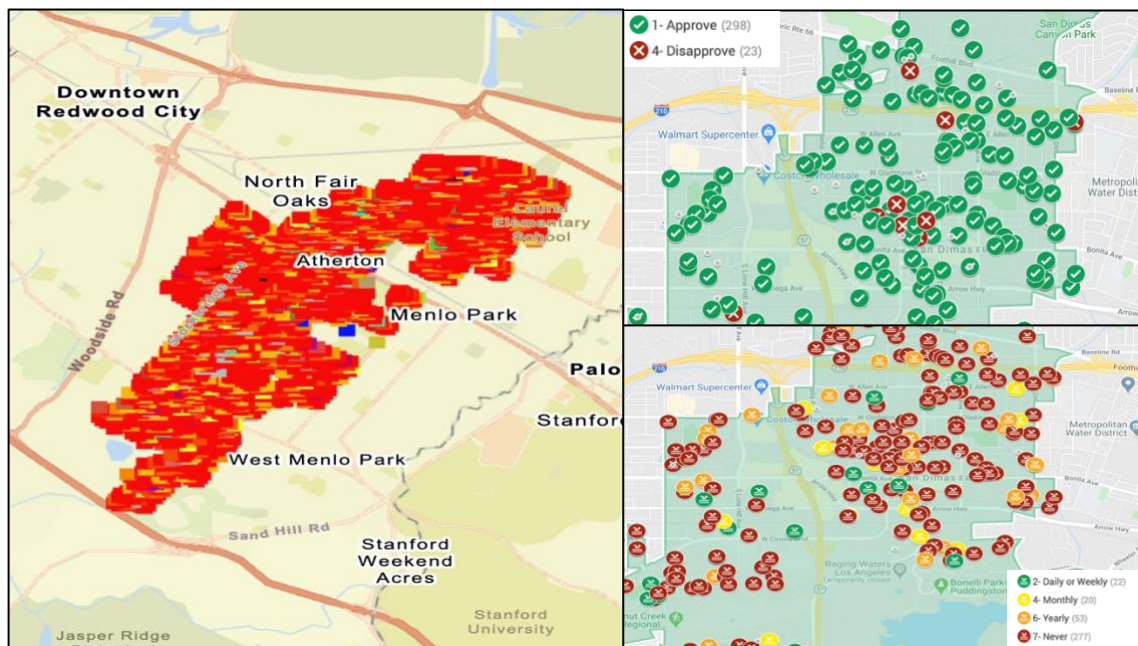

Question: What is the top issue facing your community?

Answer: *Activities for teens*

Example of a verbatim response with demographic overlay

Geospatial Mapping

Geospatial mapping of results is included. We will map survey respondents and their responses to different questions geographically. Our method ensures that individual respondents cannot be identified.

EXAMPLE: Town of Atherton residents mapped (left). Respondents mapped by geography and response to questions (San Dimas, CA- right).

Reporting

Our reporting is comprehensive and immediately usable by decision makers. Our reporting includes:

1. Draft survey (within 30 days of the survey's completion) and final report of the survey's results in both detailed and summarized form
2. Final report including survey background and results, methodological description, questionnaire results, survey top lines (displaying the aggregate percentages of responses to each question), cross-tabulations based on key demographic information, open-ended question responses with demographic overlay, analysis, conclusions, and recommendations
3. Results sent via PDF and hard copy (if requested)
4. Presentations (developed in collaboration with the Town) to Town staff and committee to review the preliminary results and data
5. Two presentations of survey results to Town staff, City Council, and other key stakeholders identified by the Town
6. In-person meetings, presentations, conference calls, and ongoing consulting

Benchmarking

We can also provide tracking and benchmarking of results to provide the Town with benchmarks of resident responses from previous research as well as provide benchmarking data of other similar agencies across the region, state, and nation. We will also provide benchmarking services over time through the duration of the contract to track progress.

Results Dashboards

Probolsky Research offers interactive results dashboards to display key findings from our research at no additional cost. Each results dashboard is customized to meet the Town's needs and goals. Results dashboards allow users to filter data based on specific demographics. You can explore example dashboards by clicking [here](#) or [here](#). Dashboards can be used for publicly sharing data or for internal use.

Presentation and Ongoing Consulting

After completing our reports, we will send our deliverables to the Town for feedback and approval. We will then present our results to Town staff, City Council, and key stakeholders as identified by the Town. We are available to present findings virtually or in-person as requested. We welcome collaboration and to provide staff and outside consultants with insight on how to interpret, understand, and use our data.

Timeline

We can meet any timeline provided by the Town. We can start our work for the Town immediately. Below is an example timeline that can be easily modified.

Probolsky Research has the necessary capacity to deliver high-quality work within the Town's preset timeline and budget. In over thirty years of business, we have never initiated a change order; we have always delivered on time and within budget.

Qualifications of Key Personnel

All Probolsky Research team members are cross-trained, and every member of our team will be intimately familiar with the Town's project details. This ensures continuity, timeliness, and quality of work product. We conduct objective research and provide impartial analysis.

While Adam Probolsky will serve as project manager and the Town's point of contact, our entire team, with broad research experience with local government and specifically the planning process, will participate in projects for the Town. We are a medium-sized firm with a team of twelve – everyone working on this project possesses an understanding of design, implementation, and statistical analysis of community surveys.

DESIREE PROBOLSKY

Chief Executive Officer

Desiree has had more than a decade of branding, market research, public policy, and strategy development experience. She works with Probolsky Research's broad client base spanning business, government, and non-profit sectors. She oversees all staff and contract compliance. A credentialed English teacher and former legislative staffer for the California State Senate, Desiree earned her MBA from the University of California, Irvine, and her undergraduate degree at California State University, Fullerton.

ADAM PROBOLSKY

President and Project Manager

Adam is a 30-year veteran of polling and strategic advising who can explain complex research methodologies and findings to any audience. He has worked on thousands of national, state, and local research projects for governments, corporations, large institutions, and non-profits. He manages all aspects of Probolsky Research's projects including staff management and operations. Adam earned a Master's degree in Data Analytics and Visualization from the Maryland Institute College of Art and has been highly involved in the community. He has served as both a planning and finance commissioner for the City of Irvine, Waste Management Commissioner for Orange County, and College Foundation President for Irvine Valley College.

MICHAEL MCLAUGHLIN

Research Director

Michael has nearly a decade of experience in academic and public opinion research. He previously worked as an elections and economics researcher at Lehigh University. Michael is involved with all Probolsky Research projects, managing development of research instruments, geospatial mapping, sample construction, data analysis, and reporting. He received a BA in Economics from East Stroudsburg University, an MA in Economics from the University of Detroit Mercy, and an MA in Political Science from Lehigh University.

JOSHUA EMENEAGER

Senior Research Analyst

Josh is an experienced researcher with more than eight years of conducting quantitative and qualitative research, largely in the public policy space. For Probolsky Research projects he is responsible for the development of research instruments, recruiting of samples, fielding, and reporting. He specializes in questionnaire design. He received a BA in Political Science from the University of Texas, Austin, and an MA in International Relations from the University of Chicago.

**ALYCE BASIL, PH.D.***Senior Research Analyst*

Alyce has more than eight years of experience conducting research in a variety of projects including media, policy, and market research. Her work has been published in peer-reviewed journals and she has presented her work at national and regional conferences across the U.S. At Probolsky Research, she is responsible for instrument development, data analysis, focus group moderation and analysis, and reporting. She received a BS in Business Administration from Nichols College, an MA in Communication from Bryant University, and a Ph.D. in Communication from the University of Connecticut.

**MARGA BUGNOT***Research Assistant*

Marga has over 6 years of research experience, specializing in quantitative surveys for market research and a background in B2B research. At Probolsky Research, she plays a role in supporting Senior Research Analysts with various research tasks. She received her BA in Advertising and Public Relations from the Polytechnic University of the Philippines.

**ROSE REGIO***Research Assistant*

Rose has over eight years of experience in quantitative research and has worked with a diverse range of clients, primarily in the field of public policy. She specializes in data and analytics. At Probolsky Research, she aids senior researchers in conducting various aspects of the research projects. She received a BS in Statistics from the University of Philippines, Diliman.

**ALTON SMITH***Equity Officer*

Alton is a disabled Marine Corps Veteran who began his career in communications and later in health care. He received a certification in Diversity, Equity, and Inclusion from the University of South Florida. Alton previously served as a Calvary Baptist Church board member where he oversaw a group men's home and as a board member of the Community of Faith, a 501c3 non-profit that fed the homeless and helped place them in housing. At Probolsky Research he is involved in ensuring our research process is inclusive and culturally relevant.

References

City of Napa

Since 2014, we have conducted an annual, statistically valid survey among Napa residents to help policy makers understand community sentiments and be responsive to the community's needs and communication preferences. The surveys are also used as a management tool for staff to benchmark and improve. We included trend analysis on all reporting for the City of Napa, tracking how results have changed over time.

City of Half Moon Bay

We conducted statistically valid multi-mode (telephone and online) surveys among Half Moon Bay residents to determine their perspectives on public safety and law enforcement issues. Our research identified specific practices and procedures that residents are most concerned with.

Contact: Matthew Chidester, City Manager

Address: 501 Main Street, Half Moon Bay, CA 94019

Telephone: 650-726-8272
